Professional Summary

Full Stack Developer / MERN Stack Developer with hands-on experience building real-time, user-centric applications serving 100+ users. Skilled in the complete development lifecycle, from designing responsive UIs to deploying secure and scalable backends, achieving up to 40% improvements in performance and accessibility. Pursuing Honors in AI/ML with exposure to integrating intelligent features into web solutions. Passionate about writing clean, maintainable code and continuously growing through internships and personal projects.

Skills

Languages: JavaScript, Python, HTML5, CSS3, SQL, Java

Frameworks/Libraries: React.js, Next.js, Node.js, Express.js, FastAPI, Flask, Tailwind CSS

AI/ML: NumPy, Pandas, Pydantic, LangChain, LLM Integration

Databases: MySQL, MongoDB, PostgreSQL

Tools: Git, GitHub, Postman, Docker, REST APIs, WebSocket, JWT, Railway, Vercel, VS Code, Google Colab, Oracle Cloud (OCI)

Technical: Full Stack Development, API Integration, Responsive Design, Prompt Engineering, Data Processing, CI/CD, Agile

Soft Skills: Communication, Teamwork, Problem-Solving, Adaptability, Attention to Detail-

Work Experience

Frontend Web Developer Intern

May 2024 – June 2024

K.J. Somaiya College of Engineering, Mumbai

- Built a mobile-first customer feedback system using HTML5, CSS3, and JavaScript, improving engagement by 25%.
- Designed interactive UI with 10+ structured feedback questions for cross-browser/device compatibility.
- Applied form validation and structured output logic to ensure accurate data capture across 100+ entries.

Full Stack Web Developer & PLC Automation Intern

Dec 2024 – Jan 2025

K.J. Somaiya College of Engineering, Mumbai

- Engineered a full-stack Student Attendance Tracker using Next.js, Node.js, MySQL, Tailwind CSS, and shadcn/ui.
- Implemented secure RESTful APIs with Kinde authentication, enabling 40% faster data access for 50+ users.
- Contributed to PLC automation with an HMI-based Four-Way Traffic Light Control system.

Projects

Industry 4.0 – Automation & Fabrication (Major Project)

may 2025 – may 2026

Academic Major Project

- Built a YOLOv11s-based automated inspection system on a 360-image dataset, achieving 98.2% precision and 100% recall for defect detection.
- Developed an ESP32-based conveyor, servo sorting mechanism, and robotic arm integration, achieving 91% real-time classification accuracy.
- Designed 3D-printed packaging and automated handling workflows, reducing manual sorting effort by 70%.

Full Stack Real-Time Chat Application

GitHub

Personal Project

- Built a real-time chat application using React, Node.js, Express, MongoDB, and Socket.io with secure user authentication.
- Supported 50+ concurrent users with 200ms latency and reliable real-time messaging performance.

GymFlow – Full Stack Gym Management System

GitHub

Personal Project

- Built a full-stack gym management system using React, Node.js, Express, and PostgreSQL to manage members, trainers, payments, and reports.
- Implemented JWT authentication and integrated an AI chatbot; deployed the application on Vercel for scalable access.

Education

Bachelor of Engineering – Electronics and Telecommunication (Honors in AI/ML)

CGPA: 8.80 / 10

Rajiv Gandhi Institute of Technology, University of Mumbai.
